

Why Partner?

Offer Free & Secure Wifi attracting more customers, higher sales per visit, more revenue, and earnings

A Helium Mobile Hotspot hosting partnership offers a unique opportunity to **attract more customers** by providing free Wifi and **getting paid** for extending the Helium Mobile network.

With Helium Mobile Hotspot, there is **no need to share your business Wifi password**, helping you **eliminate security risks** and providing a **positive customer experience**

How to Earn

A) Monthly Hosting

Join our monthly hosting program and **split the earnings 50/50**, (minimum of \$10/month) for increasing the coverage of the Helium Mobile Network.

Integrate.tech handles: the hotspot device, setup, token transfer fees, and monthly payment.

or

B) Purchase Hotspot

Prefer to own your hotspot outright? Purchase Helium Hotspot through this exclusive link using discount code:

<https://heliumdeploy.com/integrate.tech>

Device: Helium Mobile Wifi Hotspot
Discount Code at Checkout: CONNECT

Earn for providing secure Wifi access for your customers

Benefits

More Customers:

A study by Purple WiFi found that 71% of customers are more likely to return to a business that offers Wifi, while 64% said that they would spend more time in a venue with Wifi.

Higher Sales Per Visit:

55% of small business owners interviewed by Comcast said their Free Wifi resulted in higher sales per visit

More Revenue:

About 62% of respondents said customers stayed longer in their businesses since they started offering free WiFi, and 50% said this brought in more money

Helium Mobile Hotspot

SECURITY FEATURES

Security Through Client Isolation

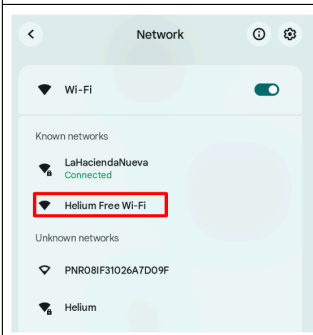

- **Security for Each User:** Each device connected to the Helium Mobile Hotspot gets its own isolated, secure virtual space
- **Protection from Threats:** Connected Internet modem and hotspot device cannot communicate with each other
- **Separate Business and Customer Traffic:** Customers get internet access and your business's internet safe and secure

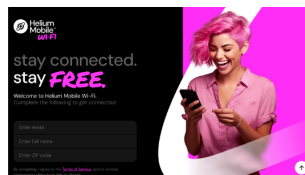

PARTNER WITH US!

Customer Selects "Helium Free Wi-Fi"

Customer inputs email, name, zip code to gain access to Wi-Fi

Customer's data is secure through Helium Mobile Encryption (WPA3)

WPA3 for Wi-Fi security, which is an industry-standard protocol that employs modern cryptographic algorithms to protect network traffic. Additionally, authentication to the Helium Mobile Wi-Fi network uses Passpoint 2.0, where each authorized device presents a certificate, and no passwords are used.
